

Customer Journey Map — Agent Creating a High Impact Incident

Stage	Action	Touchpoint	Agent Experience (Before)	Agent Experience (After This Project)
1. Log in	Opens ServiceNow, navigates to Incident → Create New	Incident form	Neutral	Neutral
2. Enter basic info	Fills Caller, Category, Short description	Incident form	Neutral	Neutral
3. Set Impact	Selects Impact = High	Impact field	No guidance on what else is needed	Urgency auto-sets to High + info message shown
4. Continue filling	Tries to fill remaining fields	Assignment group, Urgency	May skip Assignment group; Urgency editable/inconsistent	Assignment group is now clearly mandatory (red asterisk); Urgency locked to High
5. Submit	Clicks Submit	Form submit action	Sometimes saves with missing Assigned To → discovered later	Blocked immediately with a clear message if Assigned To is empty
6. Correct & resubmit	Fixes the flagged field	Assigned To field	Confusing, no direction	Directed straight to the field that needs fixing
7. Record saved	Incident created cleanly	Incident record	Data quality inconsistent	Complete, consistent, SLA-ready data

8. Later list managemen t	Tries to bulk-update State from list	Incident list view	Could accidentally change State ungoverned	Blocked with alert; must open the record to change State properly
