

User Acceptance Testing (UAT) Report — Template

[Project Name]

1. Purpose

[State why this UAT round was performed and what solution it validates.]

2. Scope

[List the features, fields, or behaviors covered by this UAT — and anything explicitly out of scope.]

3. Test Environment

Item	Detail
Instance	[e.g. ServiceNow PDI / Staging / UAT environment name]
Role used	[e.g. Administrator / ITIL / End User]
Table(s) / Module(s) under test	[e.g. Incident [incident]]
Components under test	[List the specific configs, scripts, or features being validated]

4. UAT Test Cases & Results

Test Case	Steps	Expected Result	Actual Result	Status
[TC-01]	[Steps to reproduce]	[What should happen]	[What actually happened]	[Pass/Fail]
[TC-02]	[Steps to reproduce]	[What should happen]	[What actually happened]	[Pass/Fail]
[TC-03]	[Steps to reproduce]	[What should happen]	[What actually happened]	[Pass/Fail]
[TC-04]	[Steps to reproduce]	[What should happen]	[What actually happened]	[Pass/Fail]
[TC-05]	[Steps to reproduce]	[What should happen]	[What actually happened]	[Pass/Fail]

5. Defects Logged

Defect ID	Description	Severity	Status
[DEF-01]	[Describe the defect]	[Low/Medium/High/Critical]	[Open/Fixed/Deferred]

[If no defects were found, state: "No defects were identified during this UAT cycle."]

6. Sign-off

Role	Name	Date	Decision
Tester / Developer	[Name]	[Date]	[Approved/Rejected]
Reviewer	[Name]	[Date]	[Approved/Rejected]
Business Stakeholder	[Name]	[Date]	[Approved/Rejected]

7. Conclusion

[Summarize the overall outcome of UAT — whether the solution is ready for acceptance, and any conditions attached to that acceptance.]
